DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 36-54 and 65, drawn to a method of cutting a product of a predetermined shape from a sheet material.

Group II, claim(s) 55-64, drawn to an apparatus for cutting a product having a perimeter of a predetermined shape from a sheet material.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I is that the method of cutting of Group I can be performed on one support table only; and the special technical feature of Group II is that the apparatus of Group II can be used to slit a workpiece in half.

Since the common special technical feature of Group I and II are not linked so that they would include a common special technical feature in the meaning of PCT Rule 13.2 and therefore the unity of invention is lacking.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phong H. Nguyen whose telephone number is 571-272-4510. The examiner can normally be reached on Mon-Fri.
